Purpose of this worksheet. To provide a customizable format water systems can use to track materials for each service line from curb stop to premise.

General instructions. Each row is for one service line, or one crossing for water main or for the customer's plumbing. For new lines or isolation, required and recommended entries are in bold. Use tab or arrow keys to move between cells. Use cut and paste to duplicate any row as needed by ICR. Systems can customize by adding or deleting columns. Empty cells for each customer are shown in Rows 1-2, also see the Template Instructions worksheet for detailed instructions. Note that some customer passes the water line on to the next one, or has a combined service line. Rows 13 - 20 and so forth are for example purposes only. Delete them before saving data. For very large systems (>10,000 meters), consider creating separate inventories for each pressure zone, or for each area served by a different water main.

X. Unique ID # recommended for each service line.	Note: system can assign an ID or you can use your own. Enter premise number (street address) or meter number or another unique identifier. Enter your own ID or combine premise number and meter number. If system does not use GIS, customers, premises, meters or assets, assign a unique ID to simplify inventory and updates.		Select Yes if multiple values per building, e.g., apartments, mobile home, multi-family home. If No-Other, describe in the Notes field.
